

Head & Neck

Are Headaches Bothering You?

There are many reasons why people suffer from headaches. A few of the correctable causes are sinusitis, migraine-like headaches, and refractive errors. We can help you with a detailed examination and the treatment of the same.

Neck pain has many causes, including pain coming from the muscles and fascia, joints in the cervical spine, and pinched nerves. As a specialist, he can help with headaches by addressing pain and sensitivity from problems with the neck as well as the nerves and other parts of the head.

Salivary Gland Disorders :

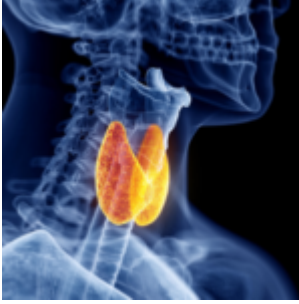

Salivary gland disorders are not uncommon in our country. There are two pairs of parotids, one submandibular, and several small, minor salivary glands in us. They can be infected with a viral or bacterial infection and present as pain and swelling of the cheeks or floor of the mouth. Swelling in the salivary gland can be a tumor growth (pleomorphic adenoma).

Head and neck cancers :

Head and neck cancers are cancers that occur in the head and neck region. Head and neck cancers include cancers of the mouth, such as those of the nose, lip, tongue, pharynx or throat, and the larynx or voice box. Head and neck cancers usually present with difficulty swallowing, voice changes, nasal bleeding, and headaches. They are also accompanied by swelling in the neck (lymph nodes), and difficulty moving the jaws.
